Berlin

Start date: Now

Competitive salary

Pioneering Start-up

Company Description

Finoa is the leading digital asset platform for institutional investors and corporations, backed by renowned investors like Coparion, Venture Stars, Signature Ventures and Balderton Capital. Founded by Henrik Gebbing and Christopher May in 2018 and based on a shared aspiration to make institutional interaction with digital assets as simple and secure as possible, Finoa has grown into a truly international company, powered by a diverse team, and serving hundreds of clients globally. If you want to join one of Europe's most exciting FinTech start-ups, be part of this once in a lifetime opportunity, and grow together with our company, then this is your chance to apply.

Job Description

We are looking for a highly capable Blockchain Integration Engineer to design, implement, and distribute a secure blockchain-based network. You will be analyzing our blockchain needs, designing customized blockchain technologies, and launching and maintaining our blockchain integrations. To ensure success as a Blockchain Integration Engineer, you should possess extensive knowledge of programming languages used for blockchain development and experience in cryptography, as well as previous experience integrating various blockchain protocols into a given infrastructure. An outstanding blockchain developer will be someone whose expertise translates into secure, fast, and efficient digital transactions.

Role Description

- Design, develop, and extend our banking software to ensure and improve stability, security, performance, functionality and robustness.
- Write applications running inside Hardware Security Modules using cryptographic libraries.
- Integrate new blockchains and protocols in the Finoa financial system.
- Review code from team members and performing tests fostering our thorough testing culture.
- Collaborate with the Product Manager and senior leadership to define and execute a product strategy that is aligned with Finoa's business growth objectives.

Requirements

- BS/MS degree or higher in Computer Science, Engineering, or another related subject.
- Highly experienced in C, C++, Git and GNU/Linux.
- Experienced in designing, shaping and maintaining critical software systems.
- Experience with Hardware-Security-Modules (HSMs).
- Experience with cryptography and major public blockchains.
- Experience in developing software for embedded systems.
- Experience in SQL and/or NodeJS.
- Excellent communication skills in English with the ability to communicate effectively with technical and non-technical teams – German and other languages are a plus!
- Previous experience within Financial Services and/or FinTech startups is a plus!

Why you should apply

Diverse and inclusive team: We are from 10+ different countries with diversity of both thought and background on a mission to disrupt the digital asset industry. We support each other and take pride in our achievements. We attract talents from companies like McKinsey, Credit Suisse, JP Morgan, Google, Moonfare, and N26.

Ownership & learning-curve: Opportunity to make an active contribution to the growth story of one of the leading disruptors in the FinTech industry.

Communication: We treat our staff like owners by being open, transparent, and providing regular communication about our direction and progress. We provide regular insights into decision making, strategy, and company-wide OKR progress so that each of our employees is aligned and empowered. We are also always aiming to improve how we can more effectively communicate.

Office: We offer both the flexibility to work remotely or to work in style and comfort from our modern office at Checkpoint Charlie, the heart of Berlin (at the moment, we all work from home).
