

WE ARE HIRING! | SysOps Engineer (m/f/div) | Location: Berlin

GENERAL DESCRIPTION

Are you ready to join **one of the most exciting Fintech projects** across Europe and become **part of the next wave of financial disruption**?

For our berlin office **we are looking for a SysOps Engineer** eager to learn and help us to shape our next generation digital asset products!

We are building a team with diversity of thought and background, where everyone is encouraged to come up with new ideas to make our customers' lives better. Our engineers not only write code but have a real meaningful impact on the direction of the product and the company itself!

Sounds exciting? Send us your cv at recruiting@finoa.io!

WHAT YOU WILL DO

- Operate, support and grow Finoa's infrastructure and make sure it is safe, functional and reliable for customers and internal users
- Improve and automate monitoring, logging, testing and deployments
- Ensure availability of production and development systems
- Research, analyze, implement and maintain new solutions for our infrastructure
- Proactively test the flexibility, scalability, and resilience of the system
- Improve rollout and deployment of new product features and installations to facilitate our fast paced and exponential growth

YOUR QUALIFICATIONS:

- At least 2 years of experience working as a System Administrator or SysOps/DevOps engineer
- Experienced on production linux servers (CentOS/RHEL or Debian), DBs (PostgreSQL or MySQL), and popular FOSS tools (puppet, ansible, chef, salt, nagios, terraform, packer, graylog, etc)
- You know how to configure, harden, and scale web servers (nginx, apache, varnish)
- You can program in at least one of the following languages: python, bash, perl, java, C, C++
- You have excellent troubleshooting skills. You can look at a problem from different angles and are not afraid to roll up your sleeves and dig into the unknown
- You are comfortable doing operational work that's not automated in the beginning, but you proactively look for ways to unload the burden through automation and identify the point where efforts on automation stop bringing value
- Excellent communication skills in English with the ability to communicate effectively with technical and non-technical teams – German and other languages are a plus!

GOOD TO HAVE

- Experience with AWS and related tools (EC2, ELBs, S3, IAM, EBS, EFS, lambda, etc.)
- Experience with DevOps tools (Jenkins, GitLab CI/CD, Docker)
- Experience with Hardware-Security-Modules (HSMs)
- Have an understanding of cryptography and popular security-related tools ([a]symmetric crypto, gpg, bitcoin, Ethereum, iptables, tcpdump/wireshark, nmap, pfSense, OpenVPN, tripwire, ossec, wazuh, auditd, nessus, snort, kali linux, QubesOS, whonix, tor, luks, veracrypt, FileVault, etc)
- Networking experience with Ubiquiti or Cisco devices (VLANs, RADIUS, firewalls)
- Experience with FreeIPA (kerberos, ldap, dns, ntp)
- Previous experience within Financial Services and/or FinTech startups is a plus!

WHY US

- This is an excellent opportunity to work in a hands-on role with a VC-backed start-up. We are growing rapidly – and you will grow with us
- You will gain knowledge, exposure and experience working in one of the most exciting industries (FinTech and Blockchain) alongside a team of experts from tech, strategy-consulting and banking, shaking up the traditional financial industry
- We have an incredible working culture: open communication, a low-/no-hierarchy environment where only the better argument counts
- You will be working in our brand-new, hip, goodies-packed, centrally located office in Berlin-Mitte (right off Checkpoint Charlie)
- You will work with the management team, directly impacting Finoa's growth

ABOUT FINOA

Your Key to Digital Asset Banking - Finoa is a regulated custodian for Digital Assets, servicing professional investors with Custody, Staking and Trading (coming soon). The platform enables its users to securely store and manage their crypto-assets, while providing a directly accessible, highly intuitive and unique user-experience, enabling seamless access to the ecosystem of Decentralized Finance (DeFi). Reference customers include the world's most renowned Venture Capital firms, large corporations and financial institutions. Finoa was founded in Berlin in 2018, is a qualified crypto-asset custodian (§64y Para. 1 KWG) and supervised by the German Federal Financial Supervisory Authority (BaFin). Finoa is backed by the financial investors Venture Stars, Coparion and Signature Ventures.
