

Blockchain Integration Engineer (m/f/div)

 Berlin, remote  Start date: Now  Competitive salary  Competitive equity

Company Description

Finoa is the leading digital asset platform for institutional investors and corporations, backed by renowned investors like Coparion, Venture Stars, and Signature Ventures. Founded by Henrik Gebbing and Christopher May in 2018 and based on a shared aspiration to make institutional interaction with digital assets as simple and secure as possible, Finoa has grown into a truly international company, powered by a diverse team, and serving hundreds of clients globally. If you want to join one of Europe's most exciting FinTech start-ups, be part of this once in a lifetime opportunity, and grow together with our company, then this is your chance to apply.

Job Description

We are looking for a highly capable Blockchain Integration Engineer to design, implement, and distribute a secure blockchain-based network. You will be analyzing our blockchain needs, designing customized blockchain technologies, and launching and maintaining our blockchain integrations. To ensure success as a Blockchain Integration Engineer, you should possess extensive knowledge of programming languages used for blockchain development and experience in cryptography, as well as previous experience integrating various blockchain protocols into a given infrastructure. An outstanding blockchain developer will be someone whose expertise translates into secure, fast, and efficient digital transactions.

Role Description

- Designing, developing, and extending our banking software to ensure and improve stability, security, performance, functionality, and robustness.
- Write applications running inside Hardware Security Modules using cryptographic libraries.
- Integrate new blockchains and protocols in the Finoa financial system.
- Reviewing code from team members and performing tests fostering our thorough testing culture.
- Collaborating with Product Management and senior leadership to define and execute a product strategy that is aligned with Finoa's business growth objectives.
- Keeping up with current blockchain technologies and cryptography methods.
- Educate sales personnel on blockchain processes that allow secure digital transactions.

Requirements

- Bachelor/Master of Science or higher in Computer Science, Information Security, or another related field.
- Highly experienced in C, C++, Git, and GNU/Linux. Experienced in designing, shaping, and maintaining critical software systems.
- Broad view on different software architectures, programming technologies, and languages.
- Experience with Hardware-Security-Modules (HSMs), cryptography and major public blockchains is a bonus.
- Experience in developing software for embedded systems as well as in SQL and/or NodeJS.
- Strong sense of long-term ownership of the work you do.
- Excellent communication skills in English with the ability to communicate effectively with technical and non-technical teams – German and other languages are a plus!
- Previous experience within Financial Services and/or FinTech start-ups is a plus!

Why you should apply

Diverse and inclusive team: We are from 10+ different countries with diversity of both thought and background on a mission to disrupt the digital asset industry. We support each other and take pride in our achievements. We attract talents from companies like McKinsey, Credit Suisse, JP, Morgan, Google, Moonfare, and N26.

Ownership & learning-curve: Opportunity to make an active contribution to the growth story of one of the leading disruptors in the FinTech industry.

Communication: We treat our staff like owners by being open, transparent, and providing regular communication about our direction and progress. We provide regular insights into decision making, strategy, and company-wide OKR progress so that each of our employees is aligned and empowered. We are also always aiming to improve how we can more effectively communicate.

Office: We offer both the flexibility to work remotely or to work in style and comfort from our modern office at Checkpoint Charlie, the heart of Berlin (at the moment, we all work from home).
