

Senior QA Engineer (m/f/div)

 Berlin, remote  Start date: Now  Competitive salary  Competitive equity

Company Description

Finoa is the leading digital asset platform for institutional investors and corporations, backed by renowned investors like Coparion, Venture Stars, and Signature Ventures. Founded by Henrik Gebbing and Christopher May in 2018 and based on a shared aspiration to make institutional interaction with digital assets as simple and secure as possible, Finoa has grown into a truly international company, powered by a diverse team, and serving hundreds of clients globally. If you want to join one of Europe's most exciting FinTech start-ups, be part of this once in a lifetime opportunity, and grow together with our company, then this is your chance to apply.

Job Description

We are looking for an experienced Quality Assurance Engineer to join our team.

As a senior QA engineer you will take full ownership of the quality of our Finoa banking system.

Starting from the system and user requirements you develop and execute a future proof QA strategy to confirm the quality of the code we develop.

Role Description

- You work closely with the Tech Management on defining and implementing a QA strategy that is aligned with Finoa's strategy and business growth objectives.
- You understand that test automation is key to a sustainable QA system in a growing environment, and we expect you to suggest and implement corresponding tools and processes.
- You are continuously looking for improvements in our test management, execution and reporting tools to keep up with Finoa's growth.
- You are not afraid to get your hands dirty and are happy to develop and execute test cases in line with our QA strategy
- At regular intervals you will share QA status updates with Finoa management and suggest relevant improvements to our architecture and processes.

Requirements

- Bachelor of Science or higher in Computer Science, Engineering, or a related field.
- 3+ years of experience in an environment developing high performance back-end systems, websites and cross-platform mobile apps.
- Experience in developing and maintain a QA strategy in a high-performance and security sensitive environment
- Proven experience in test automation of a back-end system through REST APIs. Experience with Front-end and mobile test automation is highly appreciated.
- Good understanding of advanced testing concepts like performance testing, scalability testing, security testing.
- Good understanding of different test management, test automation and test reporting tools.
- You have an agile mindset and have a strong sense of ownership, flexibility and initiative.
- Excellent communication skills in English with the ability to communicate effectively with technical and non-technical teams – German and other languages are a plus!

Why you should apply

Diverse and inclusive team: We are from 10+ different countries with diversity of both thought and background on a mission to disrupt the digital asset industry. We support each other and take pride in our achievements. We attract talents from companies like McKinsey, Credit Suisse, JP, Morgan, Google, Moonfare, and N26.

Ownership & learning-curve: Opportunity to make an active contribution to the growth story of one of the leading disruptors in the FinTech industry.

Communication: We treat our staff like owners by being open, transparent, and providing regular communication about our direction and progress. We provide regular insights into decision making, strategy, and company-wide OKR progress so that each of our employees is aligned and empowered. We are also always aiming to improve how we can more effectively communicate.

Office: We offer both the flexibility to work remotely or to work in style and comfort from our modern office at Checkpoint Charlie, the heart of Berlin (at the moment, we all work from home).
