

Frontend Developer (m/f/div)

 Berlin, remote

 Start date: Now

 Competitive salary

 Competitive equity

Company Description

Finoa is the leading digital asset platform for institutional investors and corporations, backed by renowned investors like Coparion, Venture Stars, and Signature Ventures. Founded by Henrik Gebbing and Christopher May in 2018 and based on a shared aspiration to make institutional interaction with digital assets as simple and secure as possible, Finoa has grown into a truly international company, powered by a diverse team, and serving hundreds of clients globally. If you want to join one of Europe's most exciting FinTech start-ups, be part of this once in a lifetime opportunity, and grow together with our company, then this is your chance to apply.

Job Description

We are looking for a qualified Frontend Developer to join our IT team. You will be responsible for building the “client-side” of our web applications. You should also be able to translate our company and customer needs into functional and appealing interactive applications. We expect you to be a tech savvy professional, passionate about building websites and mobile apps that are resilient, secure, and scalable to function in a global intensive business environment.

Role Description

- Work closely with the Product Management team and the CTO on defining and executing a product strategy that is aligned with Finoa's business growth objectives.
- Deliver software solutions to time, budget, and quality: take ownership for the whole development cycle – from architecture design to implementation, testing, and maintenance.
- Write code and design user interfaces that your peers praise for their elegance and add value by leveraging current trends in software design, architecture, and technology.
- Shape the overall platform architecture and design new products and services that help us propel the business forward.
- Stay up-to-date on the latest developments in technology and web/mobile security to ensure the highest levels of stability and safety for the customer.

Requirements

- Bachelor/Master of Science or higher in Computer Science, Engineering, or another related field
- 3+ years of experience designing and developing websites and cross-platform mobile apps.
- Strong knowledge of JavaScript/TypeScript, HTML, CSS, Bootstrap and React Native.
- Confident in working with Git on a daily basis.
- Familiar with the NodeJS ecosystem and npm package management.
- Experience in native app development on iOS (Swift) and Android (Java).
- Knowledge of (Postgres) SQL and cryptography is a plus!
- Experience with REST APIs and microservice-based backends.
- Excellent communication skills in English with the ability to communicate effectively with technical and non-technical teams – German and other languages are a plus!
- Previous experience within Financial Services and/or FinTech start-ups is a plus!

Why you should apply

Diverse and inclusive team: We are from 10+ different countries with diversity of both thought and background on a mission to disrupt the digital asset industry. We support each other and take pride in our achievements. We attract talents from companies like McKinsey, Credit Suisse, JP, Morgan, Google, Moonfare, and N26.

Ownership & learning-curve: Opportunity to make an active contribution to the growth story of one of the leading disruptors in the FinTech industry.

Communication: We treat our staff like owners by being open, transparent, and providing regular communication about our direction and progress. We provide regular insights into decision making, strategy, and company-wide OKR progress so that each of our employees is aligned and empowered. We are also always aiming to improve how we can more effectively communicate.

Office: We offer both the flexibility to work remotely or to work in style and comfort from our modern office at Checkpoint Charlie, the heart of Berlin (at the moment, we all work from home).

How to get in touch
